RE: Testing results of Green Pasture Blue Ice Fermented Cod Liver Oil and Blue Ice X-factor Infused Organic Virgin Coconut Oil

After Fukushima incident over two years ago, there has been a concern how the radiation is affecting various products from the Pacific Ocean. Testing performed on 70 people revealed no ill effects produced from these two products that have manufactured dates of July 2013.

Testing was performed on Spectravision equipment to assess the energetic effects of the products on acupuncture points related to toxicity and the thyroid. The thyroid was chosen, as it is the major tissue affected by radiation exposure.

Sincerely,

Dr. [REDACTED]
